

Thinking...

Shipper print Verification
& De-Aggregation

Your QUEST ends here

CSPL **KIOSK** PRINT & VERIFY

The system is configured with LAN to communicate with aggregation systems to print and verify or do tasks like de-aggregation, re-aggregation, QC, reprint after quarantine. This multifunctionality allows a single line controller configured up to 5 packing levels for print, verification and aggregation

CSPL KIOSK

Shipper print Verification & De-Aggregation

Variable data printing is a norm for GS1 for pharmaceutical industry. The Solution from Condor for shipper or palletisation is the Kiosk which is a Stand-alone system. It is compact, modular and seamlessly integrates into new or existing production environment. Yet it is comprehensive and powerful enough to adapt to work flow with a front-end software

that provides secure access control as per level. The system is configured with LAN to communicate with aggregation systems to print and verify or do tasks like de-aggregation, re-aggregation, QC, reprint after quarantine. This multifunctionality allows a single line controller configured up to 5 packing levels for print, verification and aggregation

Technical Specification

Compliance to	: CE directives. 21 CFR part 11
System dimensions	: Length 660 mm Width 600 mm Height 1530 mm
Weight	: 100 kg. (approx.)
Machine construction	: Non-corrosive pharma standard
Mountings	: Independent module

Connection / Input & Output

External connections	: Main power & LAN
Electrical connection	: Voltage: 230 VAC (+ 10%)
Frequency	: 50 / 60 Hz

Printing System

Technology	: Direct thermal or thermal transfer
Print height	: 104 mm
Resolution	: 300 dpi
Number of prints/Min	: 60

Vision System

Hand Held scanner	: Wired / Bluetooth wireless hand held scanner
Verification	: 1D & 2D codes

Production

Reading position	: Manual operation
Throughput	: Manual (Approx. 50 scan/min)
Display	: 18" monitor
Software	: CSPL KIOSK GUI to control all parameters and to comply 21 CFR Part 11

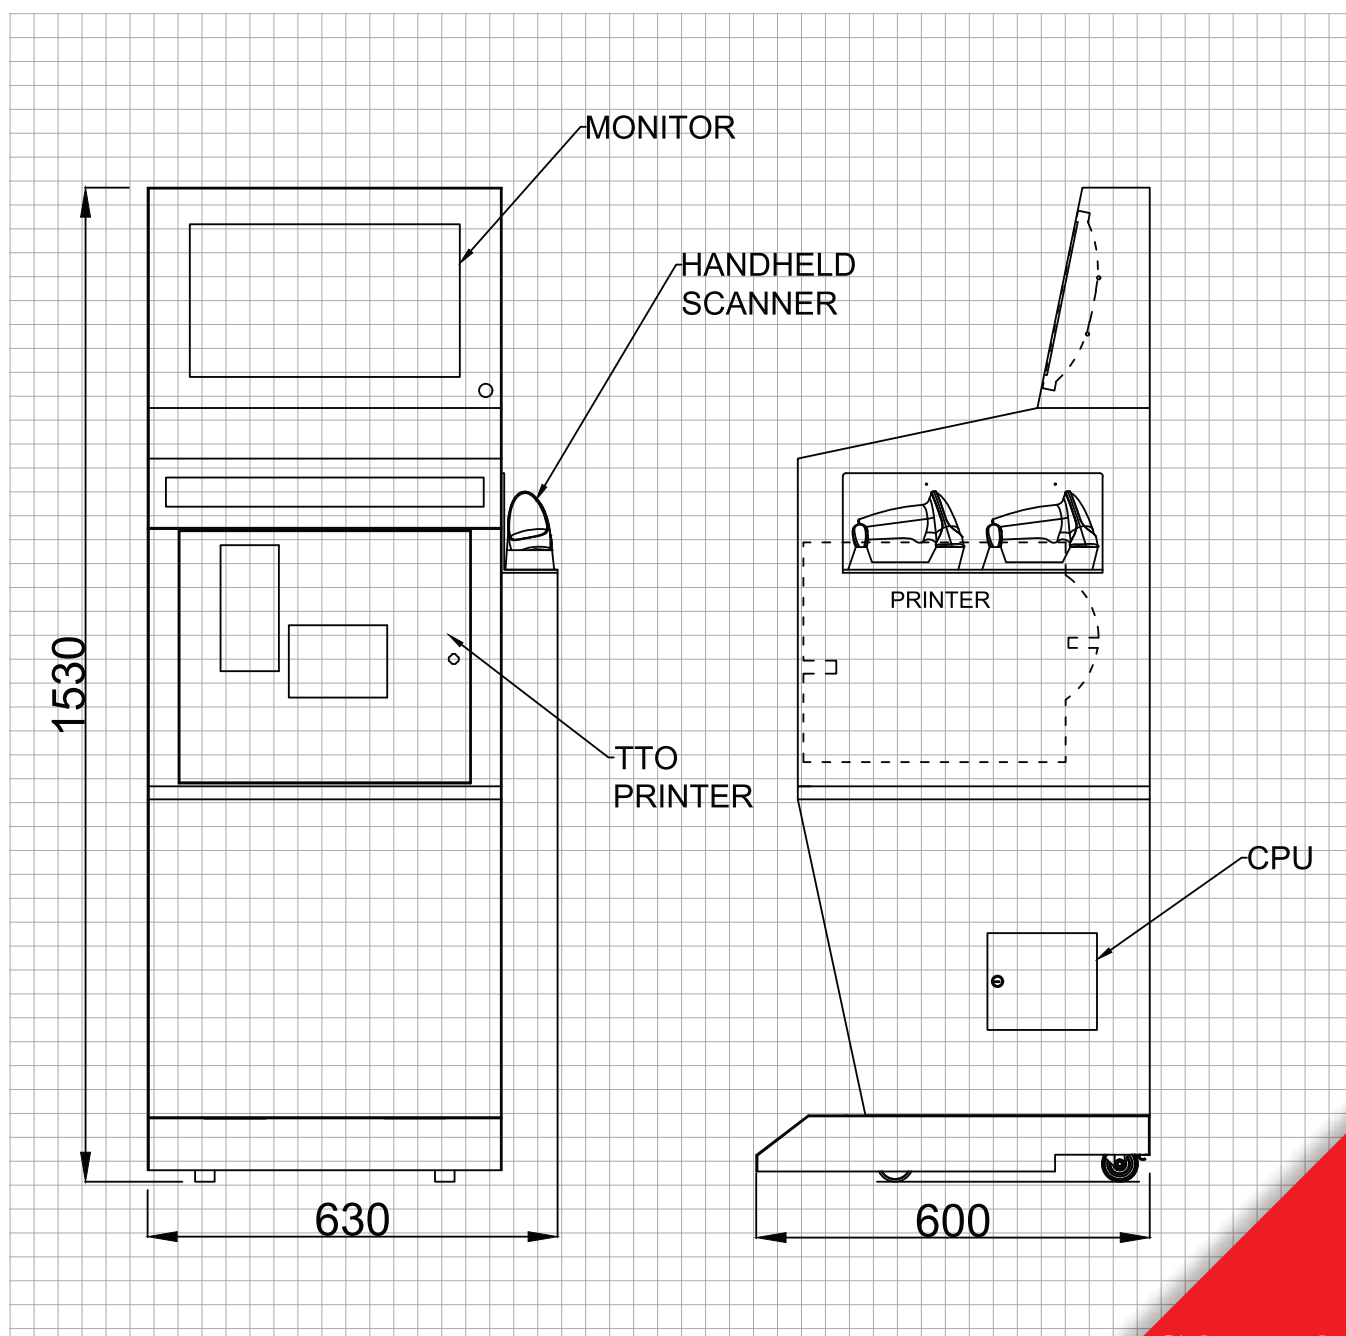

Report Output

Batch summary report, Batch detail report, Audit trail report, Alarm log report, Sample report and PC Aggregated Mapping Report.

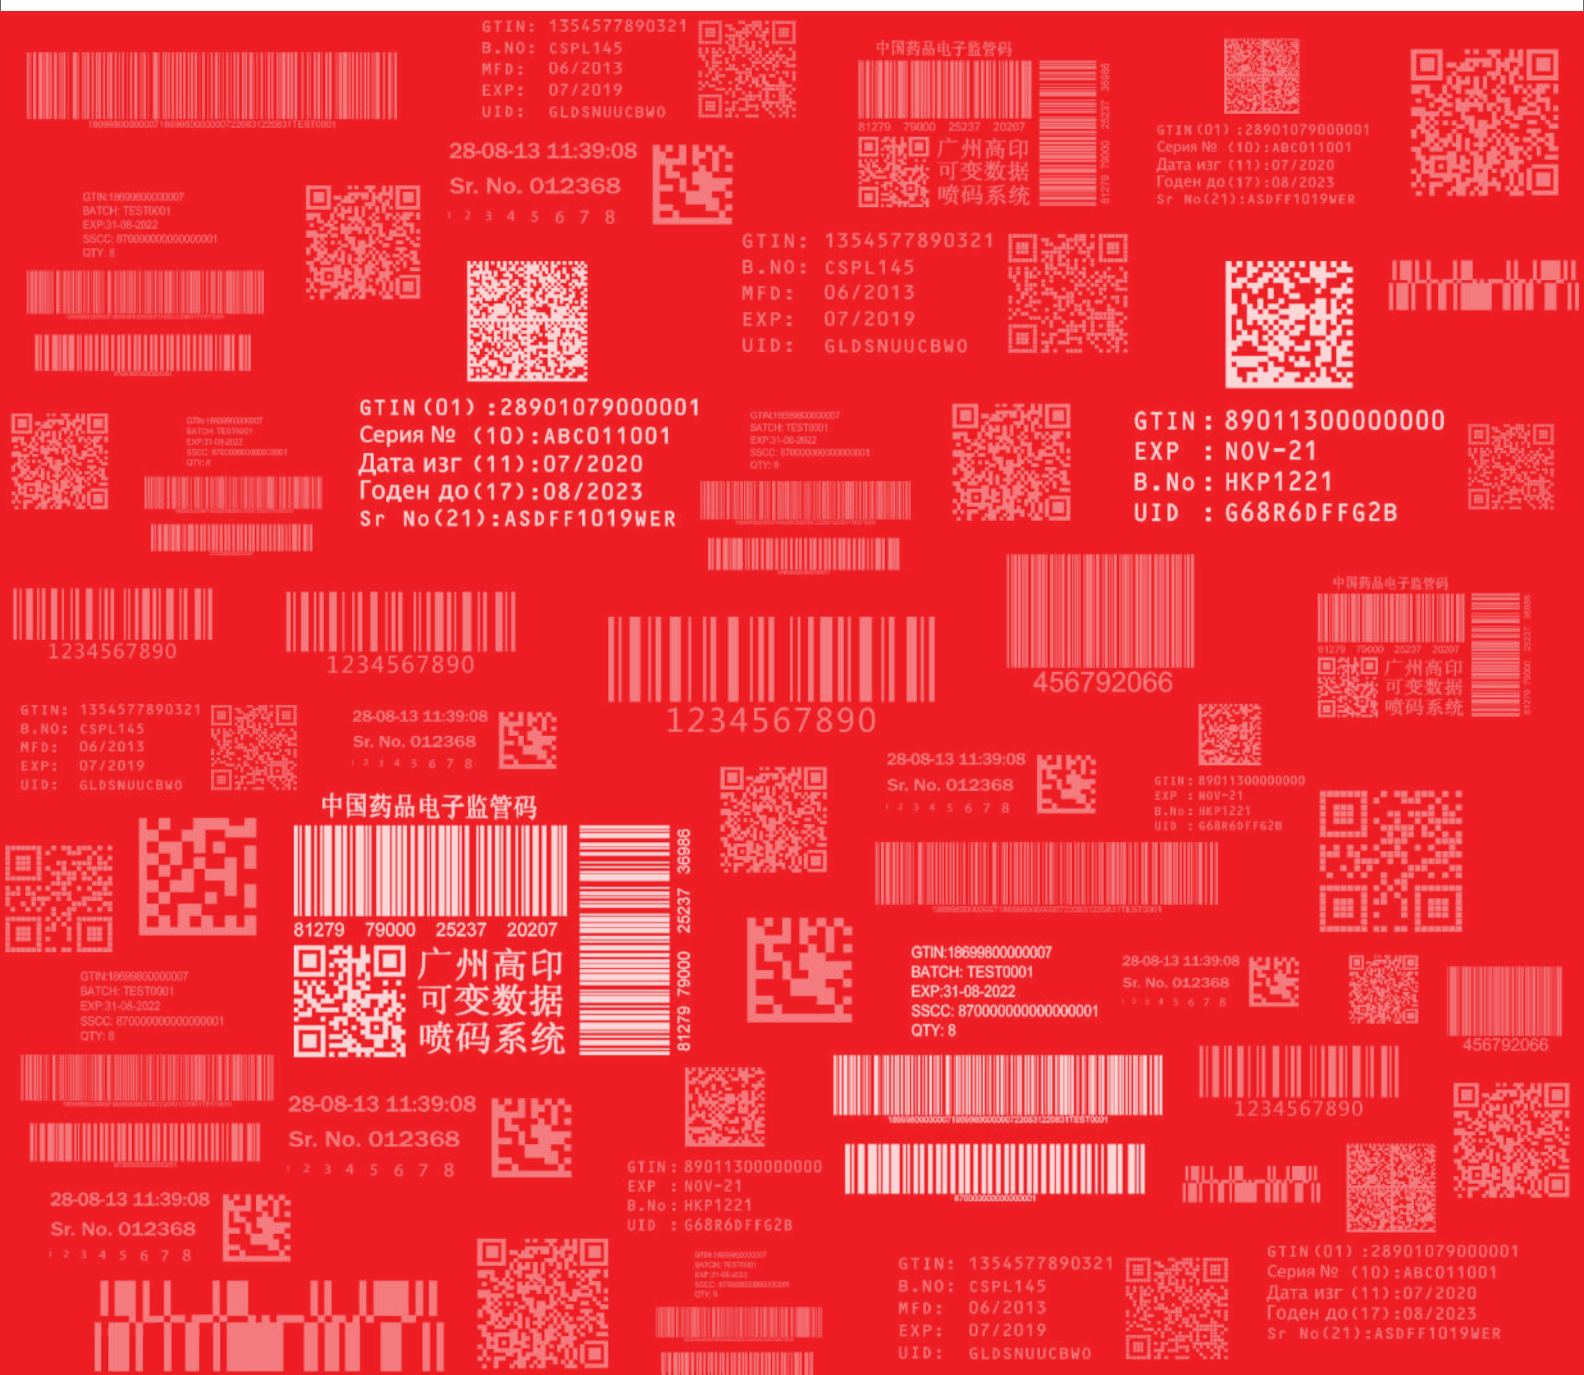

Convincing Highlights

- Compact stainless steel design as per pharma standards
- Consist of all component required like TTO / Hand held scanner / PC and Location for UPS mounting
- Having all required connectivity for LAN / Ethernet / USB gives easy access to operate
- Capable to use as line controller no separate hardware required if desire
- Warehouse handling for de-aggregation and re-aggregation is possible with same module
- Simple design can re-print label after aggregation for all level of packing include 2D with SSCC
- Samples for quarantine or for customer can be managed
- Easy to shift to location due to machine built on wheels
- Same machine can be used for multipurpose function which gives great flexibility
- No compromise on 21 CFR Part 11 compliance
- Can generate required report as per GAMP5 still customize as per customer requirement
- Easy configurable software to communicate with plant manager or third party Level 4/5 service provider
- Locking mechanism prevent the un authorized access to hardware
